A one-of-a-kind beauty, enrapturing,
that steals your breath away, leaving you
speechless. An extraordinary idea as the only
possible pathway, to get to where you want,
to explore, to go beyond.

The freedom of embracing the unknown, that
you know you'll love as a part of your very own
story. A thought that provokes your mind and
then inspires you to aim for the impossible,
making mistakes, yet being brave.

A magic je ne sais quoi that enchants and
intrigues you, moving you to feel more and to
sense uniqueness.

The choice to risk it all, the one that makes you
go for it, to impress yourself and all those who
are worth it.

Welcome to Azimut.

AZIMUT.
DARE TO AMAZE.

01

THE DESIGN & LIFESTYLE ON BOARD

GRANDE 26M, A SURPRISING IDEAL

Conceived to give life to the extraordinary, the Grande 26M is another innovative masterpiece from Azimut, premiered at the Cannes Yachting Festival in September 2022. A fluid layout made of multiple levels empowers and frees the senses while encouraging an intimate discourse with the surrounding sea, such as the cockpit area, which may be expanded to create a luxurious leisure terrace. Strategically-designed spaces grant complete privacy, suggesting a superyacht-inspired sophistication.

Rise to unconventionality with the Grande 26M.

[The exterior design, penned by Alberto Mancini, is characterized by sleek and clean lines. The sculptural tension is a constant from stern to bow and sea to sky.]

[All the outdoor areas, including the flybridge, bow lounge and cockpit are exceptionally spacious, thanks to the innovative design philosophy of the yacht.]

Welcome aboard, ladies and gentlemen.

Let us begin the tour.

SHE EXPRESSES EFFORTLESS ELEGANCE

[Not just fast looking, the Grande 26M has the performance to justify her sportive stance.]

The organic curvature of the exteriors of the Grande 26M strikes a balance with the sportive hull lines, creating an impossibly well-rounded aesthetic. According to the same concept, her imposing volume is lightened by the extensive glazed surfaces visible from the profile, which reach a maximum in the fore part of the main deck, inspiring wonder about the privileged master suite. Despite benefiting from a hard top, the yacht's proportions give her the streamlined feel of a coupé.

DECK2DECK, THE ELONGATING COCKPIT

The Grande 26M is capable of a dazzling transformation, which expands the cockpit onto a terrace over the waves. Built with versatility in mind, the opening transom comes all the way up to lie flush with the aft edge of the main deck. The new space offers boundless views of the sea and a walkaround table, accessible on all four sides.

GRANDE 26M

AZIMUT YACHTS

A MULTILEVEL SEA EXPERIENCE

From the extended, full-beam Maxi Fly down to the elongating cockpit, and finally to the bathing platform, the Grande 26M boasts a wasteless use of space for the outdoor areas. On the aft part specifically, guests have a rich selection of terraces on the sea.

TAKE YOUR TIME

The bow lounge offers guests a retreat from the main areas, which is ideal for unwinding, relaxing and enjoying maximum exposure to the marine environment. While the forward facing sofa is permanent, the counterfacing one can fold down the backrest to serve as a headrest for sunbathing time.

[A unique sunbed sofa and other freestanding furniture provide comfort under full sun, with a privileged view.]

For hosting on the fly, a full-size table for ten guests is served by an American bar and an extra storage cabinet, under the variable shelter of the opening hardtop. The designers chose to forgo the fully raised pilot house in favor of an elongated flybridge named Maxi Fly, which expands the seating arrangement forward to create a more intimate corner flanking the helm, ideal for loose gatherings before and after mealtime.

GRANDE 26M

AZIMUT YACHTS

A DRIVER'S DREAM

The exterior helm station is placed in pole position for the pilot to enjoy the advanced propulsion system of the Grande 26M, with clear sightlines and an exhilarating perception of speed.

FUNCTION AND STYLE, ESSENTIALLY REIMAGINED

Freestanding, low-profile furniture allows the full height windows to shine and yet finds the space to hide away plenty of internal storage. The living and dining areas are separated, not by barriers, but by distinctions in the styles.

[The hardwood floor amidships on the main deck runs diagonally to increase the already generous perception of width.]

SURROUNDED BY SEA

The galley bulkhead panel opens up to enhance communication and serve as a pass through.

Now, let us discover the guest accomodations. Shall we?

BRIGHT, FLUID AND SURPRISING

The full-height windows in the owner's suite offer extraordinary views of the sea. The vanity-desk to starboard barely occupies a fraction of the frame, working with the large reflective surface and the extension of the suite into the forward washing a dressing area to expand the perception of space.

The wardrobes are placed at the entry and all the way forward, where the master bathroom is, outside the main chamber to keep a clean and minimalist environment for the king-sized bed to offer complete relaxation.

DISTINGUISHED BY DESIGN

The more privately positioned section of the suite is finished with refreshing colors and materials, contributing variety, purpose and beauty at once.

[A pair of organically shaped windows flush natural light into the wardrobe and shower, spreading a sense of wellbeing through the space.]

AN ORGANIC ENVIRONMENT

GRANDE 26M

AZIMUT YACHTS

DESIGNED TO WELCOME

The double cabins follow after the VIPs, appointed with the space, storage and windows essential to enjoying extended stays on board.

THE SEMI-RAISED PILOT HOUSE

A single windshield stretches wide across the internal helm station, providing excellent visibility over the flush glass displays. There is a double stair to this centrally positioned area, ensuring easy access from anywhere and therefore safety.

[Additional pantry space and the laundry are added to the generous crew area below the bow.]

02

HER MAIN TECHNICAL FEATURES

The beauty of the Grande 26M is not solely a matter of exterior and interior design elements that combine to perfectly play out Azimut's essence. Her beauty lies also in discovering the technological advancements and special components that contribute to making her truly unique and highly innovative.

LOW EMISSION YACHT

The Grande 26M is the first model to be equipped with a new type of large pod drives developed in partnership with ZF, which, in combination with the refined hull shape and the extensive use of carbon fiber, reduces the yacht's consumption by 20%* at the most common cruising speeds.

*compared to the market average for the class with traditional propulsion.

*compared to the market average for the class with traditional propulsion

CARBON-TECH GENERATION

Azimut's pioneering use of carbon fiber lamination goes beyond pure performance. The Carbon Tech Generation offers expanded volumes on board, while maintaining excellent dynamic stability and perfect handling. Preserving the yacht's low center of gravity, the carbon fiber was focused on the upper parts of the yacht, lightening the laminated components by up to 30% and reducing the natural roll momentum up to 15%.

ACTIVE TRIM CONTROL

Automatic interceptors by Humphree gives the vessel the lift it needs to get up on plane faster or to reach that optimum running trim. In this way the resistance of the hull is automatically optimised for every speed and load condition, this resulting in increased speed and lower fuel consumption. The Humphree system is all electric powered by 12-24 Volt DC. Thanks to the design of the Interceptor it only requires a small amount of power to move the blade up and down, even under high speed operation.

AIR EXCHANGE AND TREATMENT SYSTEM

The BCOOL system completely refreshes the onboard atmosphere every hour with filtered seabreeze, especially appreciated below deck. The decentralized system uses a dual-flow heat exchanger, so it can optimize both the temperature and the humidity of the incoming fresh air in each zone without increasing the parallel HVAC's energy consumption. The NASA-patented sanitization process reproduces the purifying power of the sun, using UV rays to turn airborne moisture into hydrogen peroxide, which destroys the majority of pollutants, including bacteria, viruses, mould, allergens and odors.

UNI ISO 8666
The performance described applies to a vessel with standard configuration (standard equipment installed) and a clean hull, propellers, and rudder. It is also noted that the performance described was recorded under favourable sea and wind conditions (Beaufort scale index 1, Douglas scale index 1); different and worse sea conditions could significantly impact performance.

CE MARK
Given the continual evolution of technology, Azimut | Benetti S.p.A reserves the right to modify the technical specifications on its vessels at any time and without prior notice.

THE GRANDE SERIES

A FASCINATING VOYAGE THROUGH INNOVATION

Inspired by an affinity for grandeur, the Azimut Grande Series is a unique and emotional ensemble of Azimut's most pioneering inspiration and constructive flair, a spectacular collection of works of art that combines advanced technology with engineering mastery. Visionary design, punctuated by surprising innovation, reimagines the function of space and revolutionizes lifestyle onboard, while exclusively curated ambiances express the creative touch and aesthetic of authentic Made in Italy.

Savor the magnificence of futuristic ingenuity.

ABOUT AZIMUT

A FAMILY-MADE COMPANY CULTURE

An immense and personal passion for the sea. A clear and forward-facing attitude. A strong and relentless work ethic. Since 1969, Paolo Vitelli, the creative visionary founder and businessman behind Azimut, has been set on challenging the industry's status quo with a daring desire: bring to life an unexpected nautical experience, through yachts built to combine alluring aesthetics with construction expertise and impeccable technology.

An audacious mindset that has, over time, surprised and captivated the yachting sector, transforming Azimut into a bold and recognizable benchmark, and laying the foundation for the birth of the largest megayacht builder in the world, the Azimut | Benetti Group.

The international and management-based standing of the company today, is deeply nourished by the solid and memorable family heritage that has distinguished it from the beginning. A historically pioneering vision that enables it to continue thriving day after day, through ingenious inventions and long-term goals that look to the future with Paolo's daughter, Giovanna Vitelli.

A SUSTAINABLE VISION TODAY, FOR TOMORROW

An avant-garde vision and a strong emotional appeal have shaped the history of Azimut as a leader in the field of nautical innovation as well as its commitment to the creation of a sustainable-oriented and attentive company culture today.

An ambitious and personal touch that has allowed Azimut to grow and evolve on both levels, embracing the challenge of a future nurtured by an eco-conscious approach to boat construction and by an authentic focus and responsibility on human well-being.

OUR ECO-YACHTING PHILOSOPHY

The Azimut I Benetti Group has made tangible investments to guide the Technical as well as the R&D departments toward the construction of yachts with a diminished environmental impact. Its main areas of intervention have focused on significantly lowering fuel consumption and CO2 emissions through the development of highly efficient hull designs, innovative propulsion systems and an extensive use of carbon fiber to decrease yacht weight.

A SAFE AND HEALTHY WORK ENVIRONMENT

The forerunning shipyard of Avigliana was the first of the company's Italian shipyards to obtain the ISO 45001 certification in 2011, attesting its rigorous abidance to all occupational health and safety requirements. Recognized as the most technologically-advanced shipyard in Europe, it has also led the nautical sector revolution in terms of being among the earliest adopters of the vacuum infusion process to drive resin into a laminate, avoiding styrene emissions and therefore guaranteeing its precious workers a healthier setting.

As of 2013, all the other Italian production sites have adapted to meet the necessary requirements to obtain the ISO 45001 certification.
