Sporty sleek lines, an icon profile, massive interior volume and top performance. Now you may have it all. The only missing space is the one for compromise. «The devil is in the details» and this boat is a true statement with her new vertical bow shape, whose steel anchor shield displays the Azimut stilema trademark and the two above friezes evoke the courage of a fast and agile animal.

Spacious garage
The generous garage may host a tender up to 3,25 mt (10' 8") and on the transom the option to have an electric barbecue.

Enhancing On Board Space
A unique layout on the below level offers a central living area, fully equipped galley and three comfortable cabins to provide the utmost comfort. Two cabins are located amidship. At starboard, the VIP cabin has twin sliding beds that can be converted into a queen size and a third guest cabin with generous bunkbeds and abundant natural light, thanks to a wide panoramic window.

Volvo IPS propulsion system installed on hydrodynamic optimized hull shape
Superior manoeuverability and minimum noise and vibration level, best fuel efficiency (up to 35% reduction compared to shaft line).

790 000 €

- Shore-powered power supply
- AC electric panel: 2 installed on the fore bulkhead of the engine room and in the aft wall unit of the dinette
- -230V-50 Hz AC
- -12 V DC from battery set and from DC/DC voltage reducer

Generator

- 1 single-phase 3.5 kW/230 VAC - 50 Hz generator for EU system

Shore power sockets

- EU: 1 3P 50A socket

Batteries

- Services: 6 90 Ah@12V DC
- Generator: 1 90 Ah@12V
- Genset start up battery charger: 112 Ah 12V

Lights and sockets

- 230 V AC sockets for main utility power supply, EU type
- Internal lighting: 24V LED type

Electronic navigation instruments

- DC electric panel: 3 installed on the fore bulkhead of the engine room, in the aft wall unit of the dinette and under the central seating area of the dinette
- battery cut-out control panel: 1 installed in the aft wall unit of the dinette
- Onboard voltages:
- -24 V DC from battery set

- Remote start up

- The AC power sources terminate on the main electric panel in the engine room, for the 230 V network. The AC power sources are protected by suitably sized fuses, and introduced into the network by means of remote control switches.

- Engines: 4 90 Ah@12V DC
- Service/service backup / engine starting battery chargers: 1 60 Ah 24V

- USB sockets
- External lighting: 24V LED type
