# SX-Series Installation

Each SX-panel is a 12V panel. Depending on the second, the "+" panel type connection is of type parallel or serial.

The different is not visible to the user only visible on the label o the panel. Inside the cable outlet the two panels have different connections.

The panels: SX-12839+ and SX-12852+ have an internal parallel connection for 12V battery systems.

The panels: SX-22939+ and SX-22952+ have an internal serial connection for 24V battery systems.
